**World's fastest Class B
autoclave**

 **DURALINE**
BIOSYSTEMS INC | Clean
to Sterile
Solutions™

The new definition of sterilization speed.

Time is a relative value. It flows differently under different circumstances. But when you need to have your tools ready, you need them, well, FAST. While other autoclaves might test your patience.

Class B
Vacuum
Pouches+drying

Enbio sterilizers are up to 6 times smaller and 3 times lighter than a typical class-B / vacuum autoclave. But when it comes to work efficiency, they keep up the pace.

Typical autoclave

EnbioS. Speedmaster.

Enbio S is compact to fit even a cramped space. Unbelievably short process times will save your procedure in emergency, or allow sterilization of the instruments as you go, between patients.
