

# Magna-Clave®

## Magna-Clave: It's a lot of sterilizer for the money.

If you want a sterilizer that will do a lot of work without costing a lot of money, you want the Magna-Clave.

With a chamber size that measures 15" x 26", the Magna-Clave is ideal for busy group practices, emergency clinics, nursing homes, veterinary clinics and small hospitals.

And since the unit accommodates up to

14 Hu-Friedy IMS® cassettes, sterilization is easy.

The photograph shows you many of the other outstanding features of the Magna-Clave. Your Pelton & Crane dealer can show you even more.

So take a look here. Then take a look there.

Either way, it won't take you long to see what makes the Magna-Clave one of the best sterilizer values on the market.

# Magna-Clave

- Timer activates automatically as the desired pressure for sterilization is reached.

- Large capacity (15" x 26") makes unit ideal for busy group practices, emergency clinics, nursing homes, veterinary clinics and small hospitals.

- Safety lock system protects personnel from accidentally opening the door under pressure.

- Accommodates up to 14 Hu-Friedy cassettes for dental offices.

- Stand provides a handy storage space.

- Completes a flash cycle in 18 minutes from a warm start, 35 minutes from a cold start.

- Reservoir drain is conveniently located on the front for easy cleaning.

- Bedpan tray is available as an option for added flexibility.

## OPTIONAL MAGNA-CLAVE RECORDER

- Optional temperature recorder provides hard copy documentation of chamber temperature.

- Is designed and built to ASME specifications for safety of operation.

- Clear, concise operating instructions make training easy.

- Large chamber holds multiple surgical packs, gowns, bedpans, etc.

- Patented door lock provides maximum safety by locking entire rim of door.

- Door interlock solenoid must be energized for door to open which insures that door cannot be opened with pressure in the chamber.

- Separate temperature and pressure gauges make monitoring sterilization parameters simple and easy.

- Indicator lights show "Power On", "Heat On", "Sterile", and "Open Door", giving easy, positive indication of the status of the sterilization cycle.

- Green area is clearly marked on both the temperature

and pressure gauge showing the normal sterilization range for quick monitoring.

- Buzzer sounds at the end of sterilization cycle alerting operator that chamber can be vented.

- Water reservoir has large capacity to adequately cool condensed steam, reducing the need for refilling.

- Safety interlock prevents main heaters from activating unless door is securely locked for added safety.

- "Open door" light lets operator know when pressure has dissipated to the point where the door can be safely opened.

- Water level indicator clearly shows how much water is needed.

- Preheat feature allows faster sterilization cycles even at the start of the day.

- Mechanical stops prevent the function control from being operated in an unsafe manner.

- Omni-cleaner® safely and effectively cleans chamber and internal parts.

- Fill filter easily removes for cleaning.
